Authorization for Pond A-4 Discharge

George  
G.H. Setlock

Director

Environmental Protection Management

EG&G Rocky Flats Inc.

The U.S. Department of Energy Rocky Flats Office (DOE/RFO) hereby authorizes you to initiate a discharge of Pond A-4 at the Rocky Flats Plant, per the written request received from the EG&G Surface Water Division on Tuesday, July 27, 1993. DOE/RFO was given a verbal concurrence for the discharge from the Colorado Department of Health (CDH) July 22, 1993, and your staff was verbally informed of this approval the evening of July 22.

The verbal concurrence for the discharge from Pond A-4 from CDH was based on the results of split sampling taken with CDH on July 1, 1993. They have also been sent available copies of the analysis results of our sample split.

Because of concerns with a discharge from OU-2 of approximately 7000 gallons to Pond B-5 with a high pH, CDH requested a resampling of Pond B-5, and that results be reviewed with their personnel before any transfers from that pond to Pond A-4 for a concurrent discharge occurred. Although volatile organic analysis from that sampling showed a slightly elevated chloroform value for Pond B-5, a verbal concurrence to initiate a Pond B-5 to Pond A-4 transfer was given by CDH on July 28, with a request for additional sampling to ensure the transfer and discharge waters meet the stream standards.

Please inform us of the pond release status, any significant events that may occur affecting the pond discharge, and any new data results we obtain so we may pass the information on to CDH.

If you have any questions regarding this matter, please contact Gail Hill at extension 3424.
